

# Positive ionisation mode

Chemical subclass

Quarternary ammonium amines  
Other amines  
Polar amino acids  
Sulphur-containing amino acids  
Acidic amino acids  
Aromatic amino acids  
Arginine derivatives (guanidines)  
Tryptophan derivatives (indoles)  
Histidine derivatives (imidazoles)  
Nonpolar amino acids  
Carbohydrate phosphates  
Carbohydrates  
Carbohydrate amines  
Carbohydrate amino-phosphates  
Hydroxy acids  
Carboxylic acids  
Keto acid  
Aromatic acids  
Carboxylic acid phosphate  
Glycerophospholipids  
Steroids and steroid derivatives  
Fatty acyl  
Sphingolipids  
Glycerolipids  
Prenol lipids  
Nucleotides  
Nucleobases and analogs  
Nicotinamide derivatives  
Nucleosides  
Vitamins and cofactors  
CoA and derivatives  
Flavins  
Folates
